

History

The Hands Foundation started as a reaction to the conditions of the poor people in Monterrey, MX as witnessed by the Marrier brothers in 2003. Now ten years in to “helping those in need”, the projects have evolved, but the dedication to using 100% of donations recieved toward projects has not. From those early years of building houses in Mexico, to the hurricane relief projects, and through the projects in their local areas, The Hands Foundation has worked on, built new, or remodeled 166 homes. Their work would continue on Handicapped Accesibility houses in Wisconsin and Minnesota and now to the current partnership with Help-A-Vet for the creation of The Homeless Veterans Project.

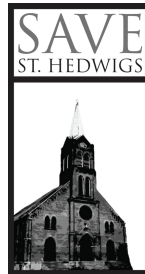

The St. Hedwigs Project

The Hands Foundation is currently restoring St. Hedwig’s Catholic Church in Thorp, WI. Upon completion St. Hedwig’s will be a state of the art recording studio and museum. The studio will be designed by world renowned studio designer Michael Cronin and will be large enough to house an entire symphony orchestra.
